Dear Parent/Guardian:

The St Johns Public Schools follow the State Of Michigan's Integrated Pest Management procedures. Although the procedures allow pesticides to be used in a school building. St. Johns Public School only uses the pesticides in a building when deemed absolutely necessary. Such applications will only be made by properly trained and licensed personnel.

Advanced notice of a pesticide application will be posted at the building entrances and in a common area near the main office 48 hours prior to applying a pesticide. In addition, if you wish to be notified by First Class United States Mail of such applications, please return the bottom portion of the notification to the address listed above and a notification will be mailed to the supplied address and shall be postmarked at least 3 days prior to the application. In an emergency, such as stringing pests, pesticides may be applied without prior notice. Parents who request notification will be notified as soon as possible after the application occurs.

The St. Johns Public Schools Integrated Pest Management Program, as well as its application records and procedures. are available for review by contacting the Operations Office, during regular business hours at 989-227-4057

Sincerely,

Robbie Gleeson

Director of Operations

Please notify me of any pesticide applications by First Class U.S. Mail for the following school building(s). Please circle all that apply

High School- Middle School - Oakview- Gateway- Riley- Eureka
